

## High Altitude Training Ground School

The Civil Aerospace Medical Institute (CAMI) along with the FAA Safety Team will be presenting training required for operating aircraft at high altitudes. The training will include high altitude physiology, aerodynamics and meteorology. At the conclusion of the classroom session, you will be given the opportunity to discover your hypoxia symptoms first hand in CAMI's portable altitude training system. After all is done, you will be able to leave with an endorsement for having completed the required ground training for operating high altitude aircraft. Airmen must present a current medical certificate before entering the Chamber.

**Directions:** St. Charles Ballroom

### A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!
